DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. Claim 3 is objected to because it depends on a canceled claim. Since the error appears to be a typo, it is being treated as depended on claim 1. Correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3, 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Fernandez (6,493,036).

Regarding claim 1, Fernandez discloses a receiving step (310), a processing step (315), and a rescaling step (320). The scaling step magnifies a portion of the image in a series of video frames (col. 4, lines 44-46). The magnified area is definable by the user and can be magnified into any size (col. 4, lines 32-52).

Regarding claim 3, see Figure 4.

Regarding claim 6, see col. 3, lines 9-13.

Regarding claims 7 and 8, in addition of rejection to claim 1, see Figure 3.

Regarding claim 9, see col. 2, lines 33-42.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fernandez (6,493,036) in view of Lewis, Jr. (4,677,482).

Regarding claims 4 and 5, Fernandez does not the analyzing step and the defining step as claimed. Lewis, from the similar field of endeavor, discloses such steps (note image analyzer 24 and switch 22). By using the analyzer 24 and switch 22, the text information on an image can be automatically detected without user's intervention. In Fernandez, in order to magnify an area of an image, the user must manually define such area. It can be time cumbersome and time consuming. In view of Lewis, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to include the analyzer and switch of Lewis into Fernandez so that the text selection could be selected automatically.

Response to Arguments

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
